SDG3: GOOD HEALTH AND WELLBEING

Qassim University's Pursuit of SDG 3: Advancing Good Health and Well-Being

Sustainable Development Goal 3 (SDG 3) focuses on ensuring healthy lives and promoting well-being for all at all ages. Qassim University, located in Saudi Arabia, recognizes the critical importance of SDG 3 and has undertaken comprehensive initiatives to address health challenges, promote well-being, and contribute to the overall improvement of the population's health.

Health Sciences Education:

Qassim University's commitment to SDG 3 is evident through its emphasis on health sciences education. The university offers a range of programs in medicine, nursing, pharmacy, dentistry, and other health-related disciplines. By training a skilled and knowledgeable healthcare workforce, Qassim University plays a significant role in addressing health needs and ensuring quality medical care for the community.

Clinical Training and Skill Development:

The university's dedication to SDG 3 is further demonstrated through its clinical training facilities and simulation labs. Qassim University provides students with hands-on training opportunities that mirror real-world healthcare scenarios. This practical experience enhances their clinical skills, ensuring that they are well-prepared to provide effective and compassionate care to patients.

Public Health Initiatives:

Qassim University is actively involved in public health initiatives that aim to prevent diseases and promote well-being. The university collaborates with local health authorities to organize awareness campaigns, vaccination drives, and health screenings. These initiatives not only contribute to disease prevention but also empower individuals to take control of their health.

Research for Health Innovation:

The university's commitment to SDG 3 extends to its research efforts focused on health innovation and improvement. Qassim University's research projects address critical health issues, such as infectious diseases, chronic conditions, and healthcare delivery. By generating knowledge and innovative solutions, the university contributes to advancements in medical practices and patient care.

Health Promotion and Awareness:

Qassim University actively engages in health promotion and awareness activities within its campus and surrounding communities. The university organizes workshops, seminars, and health fairs that cover topics ranging from mental health to nutrition. These initiatives aim to educate individuals about healthy lifestyles and preventive measures.

Mental Health Support:

Recognizing the importance of mental health, Qassim University provides counseling and mental health support services to its students. The university's counselors offer a safe and supportive environment where students can discuss their concerns, seek guidance, and receive assistance in managing mental health challenges.

Community Health Clinics:

Qassim University operates community health clinics that provide healthcare services to underserved populations. These clinics offer medical care, diagnostic services, and consultations, ensuring that individuals who lack access to traditional healthcare facilities receive the attention they need.

Collaborations with Health Institutions:

The university collaborates with healthcare institutions, hospitals, and medical centers to ensure that its programs are aligned with current healthcare practices. These partnerships facilitate the exchange of expertise, enable students to gain clinical experience, and ensure that graduates are well-prepared to contribute effectively to the healthcare sector.

Qassim University's commitment to SDG 3 is reflected in its multifaceted efforts to advance good health and well-being. Through education, clinical training, research, public health initiatives, mental health support, community engagement, and collaborations with health institutions, the university contributes significantly to the improvement of health outcomes and the well-being of individuals. Through its dedication, Qassim University plays a pivotal role in advancing SDG 3 and ensuring healthier lives for the community it serves.

3.3 Health impact

Universal Health Coverage (UHC) is achieved when a country can provide all its population with effective and sufficient health services of appropriate quality. Qassim University, Saudi Arabia, aims to achieve Universal Health Coverage (UHC) by a combination of free public healthcare and mandatory cooperative health insurance. To ensure the effectiveness of this policy, every individual should have a strong knowledge of their health-care rights and the system that guarantees it.

3.3.1 Does your university as a body have current collaborations with local or global health institutions to improve health & wellbeing outcomes?

Medical Care

<https://qa.qu.edu.sa/files/shares/handbooks/Student%20Manual.pdf> [1]

Medical care is one of the student rights. Therefore, the University presents free medical care to their students through its medical clinics in the University City in Mulidaa. These comprises general, surgery and specialized clinics, besides the dental clinic. These clinics offer medical care to the staff and officers of the University in addition to the students.

Also, the governmental hospitals offer comprehensive medical care to the Saudi citizen including the students, and also they offer medical care to the international students. The University currently constructs and prepares the University Hospital in its main site, which is a comprehensive medical project. It is a part of the Medicine City which will serve all the University related persons and the society people as well.

Meeting of the University Hospitals Integration Committee with the Health Sector Transformation Program

<https://twitter.com/QassimUniv1/status/1636421768381448192> [3]

The Medical City in جامعة القصيم #القصيم hosted a meeting of the University Hospitals Integration Committee with the Health Sector Transformation Program, in the presence of the executive directors of the cities and university medical hospitals in the Kingdom, to discuss a number of issues.

His Excellency the President of the University signs a cooperation agreement between the University Medical City, King Faisal Hospital and Research Center

<https://www.qu.edu.sa/content/news/2427> [4]

His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Dawood, President of the University, signed a joint cooperation agreement with His Excellency the Chief Executive Officer of the General Organization of King Faisal Hospital and Research Centre, Dr. Majid Al-Fayyadh, under the patronage and presence of His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, in his office on Wednesday, 15/5/1442 AH, where the agreement aims to enhance cooperation and exchange of experiences between the University's Medical City and the General Organization of King Faisal Hospital and Research Center.

His Highness the Amir of the region valued the conclusion of such agreements, stressing that they are considered a realistic activation of the principle of coordination, which is the basis of success and an essential element of excellence and the exchange of ideas and experiences, pointing out that this agreement will contribute to enhancing and improving the quality provided at the university hospital to serve its beneficiaries, noting the generous support and follow-up received by our wise government - may God support it -, and praised the efforts of His Excellency the President of the University in attracting such partnerships and encouraging students to Contribute to the service of patients and benefit from their initiatives and efforts in doubling their role in promoting health service.

The terms of the agreement, which was signed in the presence of the Undersecretary of the Emirate of the region, Dr. Abdul Rahman Al-Wazzan, the Vice President of the University, Dr. Muhammad Al-Saawi, and the Executive Director of the Medical City at the University, Dr. Khaled Al-Husais, stipulate activating the partnership and cooperation between the two sides in developing policies and procedures and following up on their implementation in the Medical City at Qassim University to ensure the highest level of care and safe services for patients, to improve the patient experience, and to provide continuous education and training for the employees of the Medical City at the university.

The agreement also aims to identify appropriate solutions to overcome the challenges faced by the health care workforce, and everything that would develop the health partnership between the two sides to enhance cooperation and transfer knowledge and skills in the fields of education, clinical

practice, training, work methods and technologies, strengthen the health and research system, and jointly seek to transfer skills and expertise in supporting health services and improving the professional skills of health workers in both sides.

During his sponsorship of the opening of specialized departments in the Medical City. Prince of Qassim: The university's medical city is a great medical edifice, and a beacon for medical sciences and treatment of patients

<https://www.qu.edu.sa/content/news/2650> [5]

His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, described the University Hospital in the University's Medical City as a great medical edifice, and a beacon for medical sciences, surgeries and treatment of patients not only in the Qassim region but throughout the country.

This came during His Highness' patronage, on Monday, 26/3/1443 AH, the opening ceremony of the departments of surgery and operations, and the departments of inpatient, intensive care and endoscopy at the University Hospital in the Medical City at Qassim University, and toured the new departments accompanied by His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of the University, and His Excellency Dr. Majid bin Ibrahim Al-Fayyadh, Chief Executive Officer of the General Organization of King Faisal Specialist Hospital and Research Centre.

His Highness the Prince of Qassim pointed out that the operation of the hospital's departments in twinning with one of the great medical edifices, King Faisal Specialist Hospital and Research Center in Riyadh, is an achievement for this great university, praising the efforts of His Excellency the President of Qassim University, who worked over the past years to start the medical city to perform its mission and mission, as we saw today the beginning of the launch of these operations and operation of the university city.

His Highness the Amir of the region expressed his pride in such achievements, which confirm the support of the Custodian of the Two Holy Mosques and His Highness the Crown Prince of the Secretary, for everything that would lead to the health of citizens and residents, which we saw during the Corona pandemic and the way to deal with it with high professionalism, as the Kingdom had the upper hand to combat the pandemic by treating citizens and residents, noting the role of health heroes after God in combating this pandemic, stressing that today we are witnessing the presence of a new team with health heroes, who are medical staff in the university city, expressing His Highness He expressed his thanks to the supporters of the University Medical City, and congratulated everyone for operating this medical edifice.

For his part, His Excellency the President of the University said in his speech on this occasion: Our celebration today of this achievement, which cost nearly one billion riyals as a total cost for the medical city, hospital and outpatient clinics, which was equipped at the highest levels, has been

achieved by the grace of God, and then through the unlimited support the university receives from our wise leadership, represented by the Custodian of the Two Holy Mosques King Salman bin Abdulaziz, and His Highness the Crown Prince Mohammed bin Salman - may God protect them -, as well as the follow-up received by the university. From His Highness the Governor of Qassim Region, and His Highness the Deputy Governor, which had the greatest impact on the achievement of what has been achieved.

Al-Daoud stressed that the university, thanks to God, is almost the only university that does not now have stalled projects, as all its projects are about to be completed soon, pointing out that rented buildings are almost non-existent at the university, as there is only one rented building left, and it will be finished during the next semester, and then it will be celebrated, God willing, that there is no rented building.

His Excellency the President of the University thanked and appreciated on this occasion His Excellency the Chief Executive Officer of the General Organization of King Faisal Specialist Hospital and Research Centre, for his efforts and support in everything possible to operate this hospital, and he also thanked the Executive Director General of the Medical City and all employees of the Medical City for their efforts, as well as all members of the University Projects Committee and the Medical City Council.

The university hospital, which was inaugurated among 33 projects from Qassim University, during the royal visit of the Custodian of the Two Holy Mosques King Salman bin Abdulaziz - may God protect him - to the Qassim region, and is located on a total area of more than 330 thousand square meters, and can accommodate 400 beds and a capacity that can be increased to 700 beds in the future, as it consists of three main buildings and six floors linked to the building of the College of Medicine by two pedestrian bridges, and the hospital also includes 16 operating rooms, and 46 intensive care rooms equipped according to The latest international medical specifications and systems, with a separate building and an area of 14,500 square meters, and the outpatient building was established to be a tributary to the health care system in the university city, with its specialized clinics of up to 85 clinics.

The hospital also includes various clinics in the field of dentistry that have been equipped according to the latest technologies used to provide care in dental treatment, in addition to a radiology department, a sterilization department and a laboratory for installations, staffed by a group of specialists in the field and internship students in the Faculty of Dentistry, and for urgent cases, an emergency department affiliated with the university hospital has been equipped with clinics for rapid examination and detection, radiology devices and a private pharmacy, and the physiotherapy department consists of a physiotherapy department and another for occupational therapy that are equipped with 16 devices and tools Therapeutic rehabilitation, in addition to two smart gyms and a hydrotherapy swimming pool.

In addition to this, the central laboratory at the university hospital is equipped with an advanced linking system called the air carrier (PST) that connects the medical departments to the vital departments and 54 stations to receive and receive samples, in addition to the blood bank that receives volunteers, and the central pharmacy is equipped with an automated dispensing system for patients that provides a service with an error rate (0%) to provide treatment and save time and effort, thus overcoming human error.

After that, His Highness the Prince of Qassim honored the contributors to the operation of the departments in the hospital, and the ceremony was attended by His Excellency the Vice President of the University, Dr. Muhammad Al-Saawi, the Vice President for Graduate Studies and Scientific Research, Prof. Dr. Ahmed Al-Turki, the Vice President for Planning, Development and Quality, Prof.

Dr. Khaled Al-Harbi, the Vice President for Educational Affairs, Dr. Muhammad Al-Sharekh, and members of the University Council.

The University Medical City receives a team from King Faisal Specialist Hospital

<https://www.qu.edu.sa/content/news/2471> [6]

The Medical City at the University received, yesterday, Tuesday, 20/6/1442 AH, a team from King Faisal Specialist Hospital, within the framework of the agreement recently concluded between the two parties, and at the forefront of their reception at the headquarters of the University City, Dr. Khaled Al-Husais, Executive Director General of the Medical City, and a number of its employees, where the visiting delegation was briefed on the work plan at the university hospital and ways to implement and activate the terms of the bilateral agreement.

This visit comes after the signing of the agreement, with the aim of developing the policies and procedures that have been agreed upon, and following up on their implementation in the university's medical city to ensure the highest level of care and safe services for patients, improve the patient experience, in addition to providing continuous education and training for the university's medical city staff, and reaching appropriate solutions to meet the challenges faced by the health care workforce.

The two sides also discussed a number of measures that would develop the health partnership between the two sides and ways to enhance cooperation between them, in addition to transferring knowledge and skills in the fields of education, clinical practice and training, work methods and the uses of modern technologies, strengthening the health and research system, as well as joint endeavor to transfer skills and expertise in order to support health services and improve the professional skills of health workers from both sides.

His Excellency the President of the University receives the Chief Executive Officer of the General Organization of King Faisal Hospital and Research Centre

<https://www.qu.edu.sa/content/news/2431> [7]

His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Dawood, President of the University, received in his office, on Wednesday morning, 15/5/1442 AH, His Excellency Dr. Majid bin Ibrahim Al-Fayyadh, Chief Executive Officer of the General Organization of King Faisal Specialist Hospital and Research Centre, in the presence of Dr. Muhammad Al-Saawi, Vice President of the University, and Dr. Khaled Al-Husais, Executive Director of the Medical City at the University, where His Excellency the President of the University expressed thanks and appreciation to Dr. Al-Fayyadh for this visit to the University.

This reception came after the tour of His Excellency Dr. Majid Al-Fayyadh to the Medical City at Qassim University, and to see its departments, facilities, various services, emergencies, and medical capabilities, accompanied by the Vice President of the University and the Executive Director of the Medical City, where His Excellency listened to a detailed explanation of all departments, facilities, devices and health services provided by the Medical City at the university.

At the end of the meeting, His Excellency the President of the University presented a commemorative shield to His Excellency the Chief Executive Officer of the General Organization of King Faisal Specialist Hospital and Research Centre on the occasion of the visit, asking God to bless the efforts of all employees of the health sector who have proven that they are up to the responsibility in their response to the Corona pandemic.

Prince of Qassim witnesses the signing of 3 operational contracts for the university hospital and tours its departments

<https://www.qu.edu.sa/content/news/1209> [8]

His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, witnessed on Monday, 11/7/1440 AH, the signing ceremony of three operational contracts at the University Hospital at the University, signed by the University with a number of companies, at the headquarters of the Medical City in Melida.

His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Dawood, President of the University, signed the first contract for the electronic health care system for the university hospital at an amount of 14,720,009 riyals with the company «Inter Systems B.V», and the second contract was signed with «Farouk and Mamoun Tamr & Co.», to secure and install patient monitoring screens with the central units for an amount of 7,979,431.04 riyals, and a contract was signed to equip the gastrointestinal endoscopy unit at the university hospital with Salhia Trading Company, for an amount of 7,216,130 riyals.

His Highness the Amir of the region blessed the signing of these contracts, praying to God for success and payment for all, then His Highness toured after signing the contracts the facilities of the university hospital, and a number of its departments, accompanied by the President and members of the Medical City Council, where he listened to an explanation of the medical city, and was briefed on a film about the most prominent university projects that were recently opened to serve the sons and daughters of the country in various governorates of the region.

The University Provides a Headquarters for Taking the Covid-19 Vaccine in Cooperation with the Ministry of Health

<https://www.qu.edu.sa/content/news/2487> [9]

The University, represented by the Medical City, signed a joint cooperation agreement with the Ministry of Health to participate in the national immunization campaign against the Corona virus "Covid-19", on Wednesday, 28/6/1442 AH, under which the University's Medical City will be one of the centers entrusted with giving and delivering approved "Covid-19" vaccines to beneficiaries.

This agreement, which was signed on behalf of the university, by Dr. Khalid Al-Husais, CEO of the Medical City, and signed on behalf of the Ministry by Dr. Khalid Al-Abdulkarim, Assistant Undersecretary of the Ministry of Health for Primary Health Care, comes from the university's belief in its societal role in serving community issues, and under the guidance of His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of the University, to harness all the university's

capabilities of facilities and professional cadres specialized in serving the country in cooperation with the relevant government agencies.

Under this agreement, the Medical City at the university will give the approved "Covid-19" vaccines and implement immunization operations for beneficiaries of health services according to the priority determinants for groups and ages approved by the Ministry of Health, and register them by the university on the approved national electronic systems, where the first dates for taking the vaccine will be determined soon after the necessary preparations are completed.

The University Medical City Performs a Successful Operation for the Treatment of Cancerous Liver Tumor

<https://www.qu.edu.sa/content/news/2803> [10]

A medical team from the Medical City of the University, represented by the Interventional Radiology Unit, was able to perform a surgery that is the first of its kind in the Qassim region, to treat a cancerous liver tumor using the chemical closure technique of the arteries supplying the tumor, where the medical team led by Dr. Abdulaziz Al-Gharras, Assistant Professor at the College of Medicine and Medical Sciences in Unaizah, Consultant Interventional Radiologist at the Medical City, succeeded in using catheterization and interventional radiology technology as a third attempt to treat it after two previous attempts to treat it in another hospital.

Where the patient was received by referral from a team specialized in gastroenterology, liver surgery and oncology from King Fahd Specialist Hospital in Buraidah, as it was found that the patient suffers from several liver tumors and his current options are limited between interventional radiology targeted treatment or intravenous chemotherapy.

The medical team in the university city reviewed with the medical team at King Fahd Specialist Hospital, and the case was discussed and appropriate treatment was provided through hepatic artery catheterization and chemotherapy directed to cancerous tumor by vascular catheterization and interventional radiology, which was done without any complications, praise be to God, which led to the patient's discharge from the hospital within a short period of the operation in health and wellness without the need for general anesthesia, severe pain or surgical incision.

For his part, Dr. Al-Gharas explained that the most important feature of catheterization operations is that they are performed through a very small opening in the thigh or wrist and with fewer complications and side effects than traditional operations with a speed of recovery.

[Under the patronage of His Highness Prince Faisal bin Mishaal. The University Signs a Cooperation Agreement with Sultan Bin Abdulaziz City for Humanitarian Services and a Contract for Equipping the University Hospital Pharmacy.](#)

<https://www.qu.edu.sa/content/news/1125> [11]

[The University Signs an Agreement for Training, Educational and Research Cooperation with Sulaiman Al Habib Medical Group](#)

<https://www.qu.edu.sa/content/news/2861> [12]

Yesterday, Wednesday, December 21, 2022, the University signed an agreement for training, educational and research cooperation with Dr. Sulaiman Al-Habib Medical Group, signed by His Excellency the Vice President for Educational Affairs, Dr. Muhammad Al-Sharekh, along with the Chief Medical Officer of the Group, Prof. Awad Al-Omari, in the presence of His Excellency the Vice President of the University, Dr. Muhammad Al-Saawi, His Excellency the Vice President for Planning, Development and Quality,

Prof. Dr. Khaled Al-Harbi, and the deans of the concerned colleges, at the main headquarters in the university city.

The agreement aimed at practical training for a number of university students at the bachelor's and internship levels in the company according to the opportunities available to it and in accordance with its requirements and internal regulations, as well as cooperation in discussing and discussing the possibility of conducting joint research and studies and consulting experiences, and searching for the best ways to benefit from the experiences of the two parties regarding the subject of this agreement, and enhancing cooperation between the two parties in the field of community service.

It is noteworthy that the university includes 12 health colleges, namely: the College of Medicine, the College of Medicine and Medical Sciences in Unaizah, the College of Applied Medical Sciences, the College of Pharmacy at the main headquarters, the College of Pharmacy in Unaizah, the College of Dentistry at the main headquarters, the College of Dentistry in Al-Rass, the College of Medical Rehabilitation, the College of Health Sciences in Al-Rass, the College of Public Health and Health Informatics in Al-Bukayriyah, the College of Nursing, in addition to a medical city that includes more than 200 medical clinics.

Dentistry at the University Organizes Scientific Research Day

<https://www.qu.edu.sa/content/news/2725> [13]

The university, represented by the College of Dentistry, held the activities of the annual scientific research day of the Faculty of Dentistry at the university, which is held in cooperation with the Saudi Department of the World Organization for Dental Research from 28-29 March 2022 AD at the University Medical City Theater, and includes research presentations by college students and interns.

The events include the presentation of 75 original research papers in various branches of dentistry prepared by fifth-year students and interns in the college, and under the supervision of faculty members in the college, most of which are ready for publication in various scientific journals, and lectures will be held on the sidelines of the events presented by a group of speakers from inside and outside the college, with the aim of enhancing the research capabilities of students and interns and presenting employment opportunities and options available to college graduates.

For his part, His Excellency Dr. Dhafer Al-Asmari, Dean of the College of Dentistry at the University, explained that the aim of this event is to be a suitable platform for college students and interns to highlight their distinguished research, exchange ideas and strengthen the ties of fellowship and cooperation between them, as well as create an atmosphere for them to launch to wider horizons of research excellence and creativity at the local and international levels, thanking His Excellency the President of the University for sponsoring this event and for his continuous support for his sons, interns and students, and for everything that would raise and develop the university.

Dr. Murad Al-Rashidi, Head of the Student Research and Presentations Unit and the Interns Supervision Unit, indicated that the event was organized within the framework of the fruitful

cooperation between the college and the Saudi Department of the World Organization for Dental Research and aims to promote and enrich research activity in the field of dentistry in the Kingdom.

<https://sdc.qu.edu.sa/content/news/1> [14]

The team of the Executive Committee of the Center visited to conclude a strategic partnership for the Saudi Pharmaceutical Industries Company and discussed aspects of cooperation between the company and the university.

Qassim University signs a cooperation agreement with the American College of Clinical Pharmacy.

<https://www.qu.edu.sa/content/news/282> [15]

Includes developmental and advisory aspects of the Faculty of Pharmacy at the university

Qassim University signs a cooperation agreement with the American College of Clinical Pharmacy.

The Vice President of Qassim University for Graduate Studies and Scientific Research, Prof. Dr. Abdul Rahman bin Saleh Al-Wasil, signed a cooperation agreement with the College of Clinical Pharmacy

American. American College of Clinical Pharmacy (ACCP)

Which was represented by the President of the College, Professor Mike Maddox, at the college's headquarters in Kansas, USA.

The contract between the College of Pharmacy at Qassim University and its counterpart, the American College of Clinical Pharmacy, includes many advisory and developmental aspects of programs, academic units, curricula and human cadres in the college, in addition to the aspect related to academic accreditation through reviews of all college programs and its various units and periodic reports.

The signing ceremony was attended by the delegation of Qassim University, represented by the General Supervisor of the International Cooperation Department, Dr. Abdul Rahman Al-Muhanna Abalkhail, the Dean of the College of Pharmacy, Dr. Mansour bin Saleh Al-Shraideh, the Vice Dean for Educational Affairs, Dr. Majid bin Muhammad Al-Jarallah, and Mr. Abdullah Al-Muqbel, the supervisor

of financial and administrative affairs in the International Cooperation Department, in addition to a number of employees of the American College of Clinical Pharmacy.

The President of the American College of Clinical Pharmacy received the delegation of Qassim University at the college's headquarters before the signing ceremony, where he welcomed the university delegation and gave them an overview of the American College of Clinical Pharmacy and its communication with educational bodies and pharmaceutical organizations around the world and the partnerships it built with them, expressing his happiness with such a partnership, which he hoped would be fruitful.

The head of the university delegation also reviewed the most prominent achievements of Qassim University and its faculties and departments before the two sides exchanged commemorative shields.

For his part, Professor Mike Maddox confirmed in a press statement that the American College of Clinical Pharmacy is looking for a good partner, especially partners who aspire to make a difference with regard to important issues in this century that are urgent to the societies of the world, and this is what we have seen from Qassim University.

He also pointed out that the participation of others is not through short-term individual projects, but through various partnerships in energies and capabilities that extend for a long time that enables the development and implementation of plans in the field of developing pharmaceutical education and its fields, and this is the real value of such strategic partnerships that must be done so that everyone learns from the other.

After the signing ceremony, the Vice Dean of Qassim University for Graduate Studies and Scientific Research, Prof. Dr. Abdul Rahman bin Saleh Al-Wasil, made a press statement to the media in which he considered that the partnership with a prestigious college globally, such as the American College of Pharmacy, is an important step in a series of steps taken by the College of Pharmacy at Qassim University in this direction, hoping that the partnership between the two colleges will achieve the desired goals and that this will benefit the college's march, students and employees in general.

He added: International cooperation at Qassim University is an important strategic goal that the university is keen to support in order to raise its level and document it through signing agreements and alliances and building important partnerships, and consolidating them in the scientific, academic and research fields.

He also stressed that international cooperation between international universities at the present time is one of the most important cultural and knowledge standards by which the development of societies is measured, and the extent to which the services of educational institutions rise to high levels of global competitiveness in the tracks of science, knowledge and research.

He noted the interest of the Ministry of Education in supporting various aspects of international knowledge and cultural cooperation between Saudi universities and their counterparts from international scientific institutions in various sciences and knowledge, through the establishment of the General Administration for International Cooperation within its general structure and supporting it with various human, material, and technical capabilities in order to build bridges of cooperation with various countries of the world distinguished in knowledge and focus on distinguished international universities in the world, appreciating His Excellency the President of the University for his care and support for everything that would advance the university's march.

The supervisor of the Department of International Cooperation and Scientific Societies at the university, Prof. Dr. Abdul Rahman bin Abdullah Al-Muhanna Abalkhail, pointed out that the Department of International Cooperation is making great efforts to develop international cooperation activities between the university and its counterparts around the world, specifically with universities that can achieve scientific, research and academic addition in general.

He said: The Department of International Cooperation seeks to achieve a number of goals by building bridges of cooperation between Qassim University and international scientific institutions in a way that contributes to achieving the university's vision, in addition to developing mechanisms for scientific cooperation with distinguished universities with the aim of developing and continuously updating the university's programs and curricula, and working to enhance opportunities to benefit from international agreements in the educational fields, which is what this agreement seeks with the American College of Clinical Pharmacy for the benefit of the College of Pharmacy at Qassim University.

The Dean of the College of Pharmacy, Dr. Mansour bin Saleh Al-Shraideh, pointed out that the agreement with a prestigious college such as the American College of Clinical Pharmacy comes within the framework of the college's desire to study the current situation of the college and submit an integrated development proposal through a field visit to a team of specialists during the coming period, pointing out that the agreement includes:

1. Assist in the development and restructuring of the departments of the college.
2. Training faculty members in different disciplines.
3. Exchange of experiences in the development of academic work fields.
4. Provide the necessary expertise and reports in the field of academic accreditation.
5. Review curricula and teaching methods.
6. Enhancing cooperation in participating in joint scientific research between faculty members in the two colleges.
7. Providing admission to fellowship and residency programs for teaching assistants, lecturers and college scholarships.
8. Providing admission to master's and doctoral programs for teaching assistants, lecturers and college scholarships.
9. Assist in the development of master's and doctoral programs that the college wishes to offer.

He hoped that the desired goals would be achieved, God willing, in order to upgrade the College of Pharmacy at Qassim University.

The Vice Dean of the College of Pharmacy for Educational Affairs, Dr. Majid bin Muhammad Al-Jarallah, explained that cooperation with the American College of Clinical Pharmacy includes reviewing study plans, curricula and all academic aspects of the programs in a way that contributes to achieving comprehensive and international quality standards, and this comes within the framework of the college's efforts to develop curricula and programs, and thus achieve quality and academic accreditation in the near future, God willing.

[The Minister of Education witnesses the signing of a cooperation agreement in medical education between Qassim and Shaqra Universities](https://www.qu.edu.sa/content/news/350)

<https://www.qu.edu.sa/content/news/350> [16]

His Excellency the Minister of Education, Prof. Dr. Ahmed bin Muhammad Al-Issa, witnessed the signing of a memorandum of cooperation in medical education between Qassim University and Shaqra University on Thursday morning at His Excellency's office at the Ministry's headquarters in Riyadh.

The agreement was signed by His Excellency the Rector of Qassim University, Prof. Dr. Abdulrahman bin Hamad Al-Dawood, and His Excellency the Acting Rector of Shaqra University, Dr. Adnan bin Abdullah Al-Shiha.

The cooperation agreement includes the desire of Shaqra University to benefit from the excellence of Qassim University in establishing medical and health colleges, designing distinguished study plans and programs, following up the implementation of those plans and programs, and transferring those experiences to ensure the establishment and development of medical and health colleges at Shaqra University.

The memorandum of cooperation includes Qassim University designing programs and study plans for medical and health colleges, following up the implementation of those programs and study plans, providing educational services to cover the shortage of educational cadres and transferring expertise and experience, in addition to developing and training faculty members by holding training courses and workshops, providing advisory services regarding contracting with faculty members in medical and health colleges, and providing advisory services regarding equipment and laboratories needed by medical and health colleges to ensure Obtaining the best equipment and laboratories that serve the study plans and programs, as well as providing academic services to students of medical and health colleges during the establishment period, and providing advisory services in the field of academic management of medical and health colleges.

His Excellency the Minister of Education blessed this agreement, wishing Saudi universities success in order to contribute to building the human being of this generous country.

For his part, His Excellency the Rector of Qassim University, Dr. Abdulrahman Al-Dawood, indicated that Saudi universities have permanent partnerships to advance their academic and research career in line with the Kingdom's Vision 2030 and the national transformation led by our wise leadership, pointing out that this agreement will contribute to the development of medical education outputs, stressing that the university is always happy and proud to provide its services in everything that contributes to the advancement of the country in various fields.

The Acting Director of Shaqra University, Dr. Adnan Al-Shiha, stressed that the agreements and partnerships between educational institutions are healthy scenes that contribute to supporting the process of university education in the Kingdom in line with Vision 2030, stressing that the excellence of health colleges at Qassim University and their use of experiential education contributed to our desire for the university to benefit from their rich experience, wishing that the agreement would achieve the desired goals.

It is noteworthy that Qassim University provides advisory services and studies to educational institutions and other bodies in various fields through the Institute of Studies and Consulting Services at the university.

College of Pharmacy signs a service agreement with Virginia Commonwealth University

<https://www.qu.edu.sa/content/news/921> [17]

The university, represented by the College of Pharmacy, recently signed a service agreement with Virginia Commonwealth University, within the framework of the university's keenness to benefit from the expertise of the American University, the enrollment of teaching assistants and lecturers in the graduate program, and mutual cooperation between the two parties.

The agreement with the university, which ranks 17th among the universities of the United States of America in the specialty of pharmacy, includes many services in the training and education programs of teaching assistants and lecturers, namely: the Doctor of Pharmacy program, residency programs in pharmaceutical sciences, and fellowship programs in pharmaceutical sciences, where 5 seats will be offered for each program, and the contract also includes training at the American University and its affiliated hospitals, in addition to providing lectures and courses for undergraduate students, and specialized development programs for faculty members. Teaching, and it was also agreed to cooperate in the field of scientific research, and other areas of interest to scholars and researchers in the field of pharmacy.

The agreement signed between the two parties is valid for a period of 6 years, where the specialized residency programs are scheduled to be based on ambulatory care, critical care, infectious care, oncology and pharmacy systems, while the fellowship programs were agreed on clinical research, geriatric study, pharmacoconomics research, products in the fields of health, and other areas agreed upon by the two parties in the future.

It is noteworthy that the College of Pharmacy at the university has recently obtained academic accreditation from the National Center for Academic Accreditation and Assessment, which aims to support the quality of educational institutions in the Kingdom, which included the Doctor of Pharmacy program of the college, which is the first government pharmacy college in the Kingdom to obtain this full accreditation until 2025, and it is also the first pharmacy college in the Kingdom that combines the American international accreditation certificate and the national accreditation of the Doctor of Pharmacy program, and this step came within the efforts of The university and its continuous endeavor to develop its cadres, and benefit from the expertise of major universities, in line with its future plans to develop educational content and raise the level of education in the Kingdom.

The University Signs a Cooperation Agreement with Al-Dawaa Company for Medical Services Ltd.

<https://www.qu.edu.sa/content/news/2214> [18]

Today, Thursday, 21/2/1442 AH, the University signed a training and educational cooperation agreement with Al-Dawaa Company for Medical Services Ltd., at the headquarters of the University City, with the aim of enhancing effective cooperation between the two sides to develop ways of education and training at various levels, and in the presence of the Vice President for Graduate Studies and Scientific Research, Prof. Dr. Ahmed Al-Turki, the Vice President for Educational Affairs, Dr. Muhammad Al-Adeeb, the Vice President for Planning, Development and Quality, Prof. Dr. Khaled Al-Harbi, and the Director of the Center for International Cooperation and Knowledge Exchange at the University, Dr. Abdullah Gift.

The agreement was signed by the Dean of the College of Pharmacy at the University, Dr. Abdul Majeed Al-Qassumi, along with Dr. Abdullah Al-Duhailan, Director of Training and External Employment at Al-Dawaa Medical Services Company, with the aim of exchanging experiences between the two sides, providing joint community services, participating in the rehabilitation and training of college students, in addition to enhancing cooperation in the training, research and educational fields.

Stanford University Preventive Medicine Research Center

<https://med.qu.edu.sa/content/pages/139> [19]

International cooperation with Stanford University's Preventive Medicine Research Center:

In April 2010, an agreement was signed for cooperation in the field of medical research between the Faculty of Medicine at Qassim University and the Center for Preventive Medicine Research (SPRC) at Stanford University in the United States of America.

General objectives:

1. Work on training courses to increase the research skills of faculty and students at Qassim University in the field of preventive medicine.
2. Work on the development of joint research projects in the field of preventive medicine.
3. Exchange visits by faculty at Qassim University School of Medicine and Stanford University.

Activities:

1. Design an intensive summer course for faculty, students and doctors from the Ministry of Health aimed at explaining how to prepare, design, manage, analyze and publish research projects.
2. Visit members of Stanford University's Preventive Medicine Research Center to Qassim University School of Medicine to train faculty and researchers in preventive scientific research, conduct workshops and lectures in prevention research and contribute to joint research work.
3. Visit faculty from Qassim University School of Medicine to Stanford University for 3 weeks of training.
4. Provide technical assistance in writing research proposals and analyzing data.
5. Research courses in preventive medicine were held through online seminars, and 2-3 live interactive sessions were conducted and broadcast from the Stanford University Research Center.
6. Allowing the faculty of medicine at Qassim University to access the scientific sources and information on the Stanford Research Center website, which has the greatest impact on enriching the research process at Qassim University School of Medicine.
7. Providing technical support to researchers at Qassim University School of Medicine by launching a health promotion program on the university's website.

International cooperation with Maastricht University

<https://med.qu.edu.sa/content/pages/141> [20]

In June 2011, the Medical Education Cooperation Agreement was activated between the Faculty of Medicine at Qassim University and Maastricht University in the Netherlands, the first to implement the problem-solving medical education system in Europe, which is the latest educational program in the world today.

Activities:

1. Faculty members from Qassim University School of Medicine visit Maastricht University for two weeks to attend a training course on modern methods in the medical education system based on solving dilemmas.
2. Collaborate to prepare a test to measure the sophistication of student levels.
3. Visit the faculty from Maastricht University to the Faculty of Medicine of Qassim University with the aim of discussing the executive steps of the cooperation agreement between the two institutions and holding workshops for faculty members of the Faculty of Medicine.
4. Organizing a workshop in collaboration with faculty members from Maastricht University entitled "Student Evaluation Methods"
5. Organizing a workshop in collaboration with faculty members from Maastricht University entitled "Using lectures in self-learning programs for students" at the maternity and children's hospitals.

6. Organizing a workshop in collaboration with faculty members from Maastricht University entitled "Effective Feedback Rules" at the Maternity and Children's Hospitals.
7. Design and hold a test to measure the sophistication of the educational level of students of the Faculty of Medicine of Qassim University (Progress test)

Signing of a "remote" agreement to establish an intellectual property support center with the Saudi Authority for Intellectual Property

<https://www.qu.edu.sa/content/news/2012> [21]

The University, represented by the Vice Rectorate for Graduate Studies and Scientific Research, and the Center for Innovation and Intellectual Property at the University signed on Monday, 11/2/1442 AH, a service agreement on the establishment of centers to support intellectual property, with the Saudi Authority for Intellectual Property, where the agreement was signed remotely by a representative of the University, Prof. Dr. Ahmed Al-Turki, Vice President for Graduate Studies and Scientific Research, along with the Executive Vice President for Intellectual Property Policies and Partnerships, Eng. Sami bin Ali Al-Sudais.

The agreement aims to join the University's national network of intellectual property support centers at the Authority, through which mechanisms are implemented to promote and support the foundations of national innovation, enable access to and benefit from technical and scientific expertise, provide assistance in the search and analysis of intellectual and technical property databases, to meet technical and business needs, in addition to raising knowledge of the advantages of intellectual property rights in general and information on patents in particular.

This agreement also seeks to define the procedures for hosting IP Support Centers, to ensure that beneficiaries have access to services tailored to their technical and information needs through the establishment of a national network of IP support centers in the host entities, including the second party to this Convention.

The Saudi Authority for Intellectual Property (SAIP) works to regulate, support, develop, sponsor, protect and upgrade the fields of intellectual property in the Kingdom in accordance with international best practices, and the establishment of the National Network of Intellectual Property Support Centers is a fulfilling part of the Authority's competencies and tasks, which is to provide information on intellectual property rights and make them available to the public, and to raise awareness of the importance of intellectual property and the protection of its rights, through the dissemination of

technical data related to intellectual property rights in the sectors of industry, business and academia, and awareness on Appropriate use of IP as a tool to encourage and support innovation.

The network of IP Support Centers contributes to supporting the development of institutions by developing the results of technical research and the network of IP Support Centers provides many services to its beneficiaries: assistance in search services in IP databases and technical information taking into account the confidentiality of information, as well as identifying the problems of technical institutions and research topics within universities and research institutes, providing information on the latest scientific findings in various technical fields, participating in awareness-raising activities on intellectual property rights, as well as participation In the development of research findings, identify opportunities supporting technology transfer efforts.

For his part, the Vice President for Graduate Studies and Scientific Research, on behalf of His Excellency the President of the University, Prof. Dr. Abdulrahman bin Hamad Al-Daoud, and the employees of the University, expressed many thanks and gratitude to the Authority for its cooperation with the University and other interested parties in the subject of research and intellectual property, pointing out that this has had a great impact in deepening this meaning and consolidating the concept of culture related to intellectual property, noting that the University has a specialized center, which is the Center for Innovation and Intellectual Property whose first goal is to spread the culture related to property. Intellectual, consolidating its meanings and giving it sufficient sanctity, attention and respect in accordance with the generous directives in this subject.

Al-Turki added that the university has taken important steps in this field to support intellectual property and pay attention to the courses held by the Authority, and the agreements it concludes with universities, expressing his appreciation and pride in the launch of this agreement, which is in this sense, including materials that will be a fundamental building block in the dissemination of culture related to intellectual property, support for patents and support for the transformation of ideas into advanced products that contribute to the knowledge economy in our dear homeland.

The University Signs a Cooperation Agreement with Al-Dawaa Medical Services Co. Ltd.

<https://www.qu.edu.sa/content/news/2214> [22]
