

## Sustainability Literacy

Qassim University in Saudi Arabia is dedicated to fostering sustainability literacy among its students, faculty, and the broader community. This commitment is evident through the integration of sustainable development concepts into its strategic plans, academic programs, research initiatives, and community outreach.

## Strategic Commitment to Sustainability

The university's strategic plan for 2020-2025 emphasizes sustainable development, embedding sustainability into its mission and vision. This framework guides the university's efforts in addressing climate change and promoting environmental stewardship.

## Academic Integration

Qassim University incorporates topics related to sustainable consumption and production across various disciplines. This approach educates students on the environmental, social, and economic impacts of their consumption choices, fostering a comprehensive understanding of sustainability challenges and solutions.

## Research Initiatives

The university established the Qassim Sustainability Research Centre, focusing on environmental sustainability studies. The center aims to address regional and global environmental challenges through research, innovation, and the promotion of sustainable practices.

## Community Engagement

Qassim University actively participates in community initiatives, such as the "Green Qassim Land" project, which involves planting seedlings in various locations to enhance green spaces. These efforts promote environmental awareness and community involvement in sustainability practices.

## Operational Practices

The university implements sustainable practices within its operations, including waste disposal activities, recycling, and energy recovery processes. These initiatives align with the concept of a circular economy, contributing to a more sustainable and balanced environment.

Through these comprehensive efforts, Qassim University cultivates sustainability literacy, preparing its community to contribute effectively to sustainable development goals and environmental conservation.
